---

We are pleased to announce the [release](#) of PresbyterySite 0.0.9! This is primarily a bugfix release.

One bugfix resulted in faster page loads--PresbyterySite's use of the [Scriptaculous](#) / [Prototype](#) JavaScript framework/library conflicted with [RocketTheme](#)'s [Versatility III](#) template's use of the [Mootools](#) JavaScript framework/library, so PresbyterySite now uses Mootools for fading status messages in and out. Mootools is compressed, so results in significantly faster page loads.
