PresbyterySite intends to become the best Presbytery website software in the world. Our goal is to present your presbytery's information in the groupings most useful to your site visitors, and to streamline the work of your clerk.

PresbyterySite is composed of plugins for the full-featured, easy to use content management system called Joomla. Install Joomla and you have one of the best websites in the world already! We've custom-built several plugins that provide the unique functionality presbytery websites want most:

- Directory of congregations
- Map of congregations
- Directory of committees

We hope to add more valuable features including:

- Presbytery meeting info (date, time, location, docket, reports due, communications, reports, minutes)
- Directory of officers
- More administration features to allow your presbytery's info to be grouped & related more helpfully
- Email notifications for limits, quotas, and deadlines.
- Presbytery Handbook - style summary of presbytery information
