

PresbyterySite 0.0.2 released!

Written by Tim Black

Monday, 27 November 2006 11:14 - Last Updated Wednesday, 20 December 2006 12:20

PresbyterySite is composed of plugins for the full-featured, easy to use content management system called Joomla. Install Joomla and you have one of the best websites in the world already! We've custom-built several plugins that provide the unique functionality presbytery websites want most:

- * Directory of congregations
- * Map of congregations
- * Directory of committees

We hope to add more valuable features including:

- * Presbytery meeting info (date, time, location, docket, reports due, communications, reports, minutes)
- * Directory of officers
- * More administration features to allow your presbytery's info to be grouped & related more helpfully
- * Email notifications for limits, quotas, and deadlines.
- * Presbytery Handbook - style summary of presbytery information

For more info, screenshots, downloads, and an online demo, please visit our [website](#) or our [SourceForge project page](#) at the links below!
