Wednesday, 20 December 2006 05:56 - Last Updated Monday, 17 September 2007 12:53

In future releases of PresbyterySite we hope to implement the following features, listed in order of priority. Let us know which features are a priority to you!

- **Presbytery meeting schedule.** Each meeting will be listed with its date, time, and location, with links to its docket, reports due, communications, reports, and minutes. (Requires integration with DocMan to associate documents with meetings.) Email reminders will be scheduled to remind presbyters of the meeting date, time, location, documents, documents due.

- **Directory of officers** (requires integration with Community Builder for extended contact info)

- **Info window** for each congregation on the Google Map with links to driving directions.

- More **administration features** to allow your presbytery's info to be grouped & related more helpfully

- **Email notifications** for limits, quotas, and deadlines like the ones in your Bylaws

- **Presbytery Handbook** - style summary of presbytery information

- **Translations** into Spanish & Portuguese

- **RSS feeds** to allow multiple Presbyteries in the same denomination share information.

Potential uses: Connect your site to one other Presbytery, and your page listing the other Presbyteries now lists them all! This will also enable the GA stated clerk to receive automated updates of your Presbytery's contact info.
